

SENIOR FIRE PROTECTION ENGINEER – SEATTLE, WA AREA

AEGIS Engineering is a Fire Protection Engineering firm based just north of Seattle in Washington State. We are a small full-service FPE consultancy providing comprehensive smoke control, fire protection, and fire alarm systems design, as well as building code consulting and performance-based design services. Founded in 2006, we have enjoyed success through a reputation of delivering thoughtful and innovative FPE solutions that balance the needs of project stakeholders while working to create success for everyone involved.

We are seeking a full-time, well-qualified, personable consulting FPE for immediate hire.

QUALIFICATIONS

The ideally qualified candidate will have:

CREDENTIALS AND EXPERIENCE

- Diverse portfolio of successful professional FPE experience as a consulting engineer and project manager, serving new and repeat clients
- Possess PE license in State of Washington in Fire Protection Engineering (or ability to obtain)
- Eligibility for security clearance for private and government agencies

COMPETENCIES

- Proven ability to interpret and apply IBC and IFC fire protection and life safety code provisions to various occupancies in new and existing buildings
- Successfully manage multiple projects with competing priorities and conflicting deadlines
- Ability to clearly communicate technical issues verbally and in writing
- Strong problem analysis and solving skills

PERSONAL QUALITIES

- Strong interpersonal skills
- Ability to lead by example
- Initiative and ambition
- Personal integrity
